## Acknowledgements

This report is the result of extensive interviews with many people and companies from throughout the entertainment content value chain including storage component and systems companies as well as companies that incorporate storage into their content creation applications. The list of companies contacted is extensive and the data we gathered over several months is pretty comprehensive, not all of it is included in this report. Our thinking and projections were shaped by many inputs. In particular we would like to thank the following companies and organizations for their help and information: Avid Technologies, Chan and Associates, Inc., DataDirect Networks, Dolby, Edit Chair, Facilis, EFILM, Exavio, Fox, Front Porch Video, IBM Media and Entertainment Division, Isilon, Pathfire, Maximum Throughput, NetApp, Omneon, Panasonic, Quantum, Rourke Data, SeaChange, Seagate, SGI, Sony, Sun, Turner Broadcast, Technicolor, Warner Brothers.

Also thanks to the following individuals for their help: Brad Winett, Steve Canepa, Carey Capaldi, Curtis Chan, Carl Immediato, Tom Inglefield, Clyde Smith, Jim Wheeler, Colin Dixon, Geoff Stedman, and Wayne Arvidson.

## The Author

Tom Coughlin, President, Coughlin Associates has been working for over 25 years in the data storage industry at companies such as Ampex, Polaroid, Seagate, Maxtor, Micropolis, Syquest, 3M and other companies. He has over 60 publications and 6 patents to his credit. Tom is active with IDEMA, the IEEE Magnetics Society, IEEE Consumer Electronics Society, SMPTE and other professional organizations. He is the founder and organizer of the Annual Storage Visions Conference (before the International CES) as well as the Creative Storage Conference (before the annual NAB show). Coughlin Associates provides market and technology analysis as well as Data Storage Technical Consulting services. For more information go to [www.tomcoughlin.com](http://www.tomcoughlin.com).

## **Executive Summary**

This report is the seventh report on data storage and emerging applications and the fifth report on data storage and the entertainment market published by Coughlin Associates.

Data storage is a key element in the digital transformation of content creation, editing, distribution and reception. Data capacity increases, form factors, lowered product prices and growing familiarity with digital editing and distribution are key components in the continued growth and development of entertainment. Because of the large file sizes required for high resolution images there is increasing demand for high capacity storage devices. The entire content value chain of content creation, editing, archiving, distribution as well as consumer electronics content reception devices provide an overall accelerating feed-forward mechanism. This drives growth in data storage for entertainment content applications.

For many archiving and distribution applications where content is relatively static low cost/high capacity ATA storage, optical disks and tape-based storage libraries will predominate.

Access density requirements and increasing volumetric density requirements for storage systems used for content creation, editing, archiving and distribution drives the use of smaller form factor storage devices in this market. It may also open up additional requirements for the various elements in the high end storage hierarchy.

We list some key points of the report in the following list.

### **Key Points**

- Creation, Distribution & Conversion of video content is a huge demand driver for storage device manufacturers
- As image resolution increases storage requirements explode.
- The development of HD TV and other high resolution venues in the home and in mobile devices will drive the demand for digital content
- Between 2008 and 2014 we expect more than a 12X increase in the required digital storage capacity and over 16X growth in storage capacity shipments per year (from 2,424 PB to 39,722 PB).
- About 85% of the total storage capacity will be used for content archiving and preservation in 2008. We believe that this will increase to 97% of total capacity by 2012 due to improved ROI on converted content and lower costs for conversion and preservation.
- In 2008 we estimate that 57% of the total storage media shipped for all the digital entertainment content segments was tape with about 32%

optical, about 7% hard disk drives and 4% flash memory (mostly in digital cameras and some media distribution servers).

- By 2014 tape units will increase to 61%, optical decline to about 15%, hard disk drives increase to 19% and flash increasing somewhat to 4.9%.
- Total revenue for storage media will increase more than 2X from 2008 through 2014 (\$387 M to \$807 M)
- Total revenue for content and distribution storage will increase about 2.8X from 2008 through 2014 (\$3.5 B to \$9.9 B)
- The single biggest application (by storage capacity) for digital storage in the next several years as well as one of the most challenging is the conversion from film and other analog formats to digital content
- Over 13 Exabytes of digital storage will be used for digital archiving and content conversion and preservation by 2014
- The creation of content retrievable databases make new distribution models possible
- Adoption of digital cinema is proceeding apace with theater subsidies established and using the DCI standards
- There is a pressing need to develop policies and procedures for format conversion to combat format obsolescence
- Up to 1,600 Terabytes may be required for a complete digital movie production at 4K resolution and some production is moving to some 8K and stereoscopic production. These are expected to increase storage requirements significantly.
- Non-linear editing requires high performance disk drives and increasing amounts of network storage. Over the forecast period direct attached storage will decline significantly in the editing environment.
- ATA HDD arrays are becoming the dominant mode for readily retrievable fixed content storage.
- Magnetic tape will remain as an archival media although use in other applications will lessen, particularly content capture
- Hard disk drives for “active archival” applications will begin to gain some momentum, many of these solutions will include energy saving features such as MAID
- Digital cameras using optical media, flash memory, and hard disk drives will gain momentum over traditional video tape
- Increasing demand and profitability are resulting in capacity increases and capital equipment spending by storage and component companies.
- Digital Theater projection is enabled by less expensive projection technology and inexpensive fixed content storage.

The data presented in this report is subject to change as the content storage market develops. We have additional information that we have gathered in addition to that included in this published report. We will continue to monitor and develop our models of this market as time goes on. We would be glad to work with customers on specialized presentations or reports and in general to conduct

research to answer specific questions on a project or ongoing basis.

# ANNOUNCING NEW MEDIA AND ENTERTAINMENT STORAGE REPORT

The *Entertainment Content Creation and Distribution Storage Report 2009* will be the fifth annual comprehensive document on this topic with many charts and tables. The report is due for release by the end of 2008. The report analyzes requirements and trends in worldwide data storage for entertainment content acquisition; editing; archiving and digital preservation; as well as digital cinema; broadcast; satellite; cable; network; internet and VOD distribution. Capacity and performance trends and media projections will be made for each of the various market segments.

# STORAGE VISIONS™ 2009

AN ENTERTAINMENT STORAGE ALLIANCE™ EVENT 

January 6-7, 2009 Flamingo Hotel-Casino, Las Vegas, NV, USA

Dr. Tom Coughlin is the Distinguished Author of the New Book "Digital Storage In Consumer Electronics" and the Founder and Chairman of the Storage Visions™ Conferences.

### Home Storage Virtualization

Come and Learn about the Latest Activities in Home Storage Virtualization!

## The Storage Visions™ 2009 Conference Theme:

### Tools for the Digital Content Revolution

—Storage Technologies Enabling Rich Content Creation, Distribution and Use

**BE Where Digital Storage Converges with Content Creation and Delivery!**

**FIND HOW all the new information trends will drive major storage growth over the next 10 years!**

**JOIN CEO's, Industry Leaders, manufacturers and end users at Storage Visions 2009!**

**FIND HOW Digital Content will be Created, Protected and Stored from the executives, analysts and professionals at the forefront of Digital Technology!**

Don't go to the 2009 CES until you know about the convergence of technologies that are revolutionizing the creation of digital content, its distribution and consumer electronics. The pre-CES 2009 Storage Visions Conference brings together technologists, vendors, retailers and users to explore the pod-, web-, life-casting consumer revolution and how you will preserve, protect, and search your life on Digital Storage. Conference sessions explore key infrastructure supporting the growth of richer media experiences including storage technologies, privacy protection, power creation and management, search and indexing technologies, home and mobile storage, next generation user needs and business opportunities.

### What industry leaders say...

"The Conference paid for itself 5 times over!" —David Kreft, NSA

"Storage Visions is a great opportunity to hear from industry leaders on market trends, speak with customers about their needs, and meet potential partners for targeted solutions, all in a setting that fosters one on one business conversations. We were delighted with Storage Visions 2008 and look forward to Storage Visions 2009."

— Dean Neumann, Director, Product Marketing, Bycast Inc.

"Storage Visions brought together key decision makers in storage, computing and IT and offered a number of valuable and timely presentations. Armed with knowledge from the sessions and the many great demo's and exhibits, attendees can return to their organizations to investigate and deploy effective storage solutions."

— Brian Berger, Chair, Trusted Computing Group, Marketing Work Group and Executive Vice President, Wave Systems.

**Sign up at [www.StorageVisions.com](http://www.StorageVisions.com)**

If you are a user, manufacturer or reseller of digital content solutions, learn how you can speak, exhibit or sponsor at Storage Visions 2008. Call us at 408 871-8808

## Consulting

Tom Coughlin is available for technical and market consulting on digital storage devices, systems and applications. Clients have included, Network Appliance, PriceWaterhouseCoopers, Quantum, LSI, Pillar Data, and Seagate Technology.

Tom Coughlin, President, Coughlin Associates has been working for over 30 years in the data storage industry at companies such as Ampex, Polaroid, Seagate, Maxtor, Micropolis, Syquest, and 3M. He has over 60 publications and six patents to his credit. Tom is active with IDEMA, the IEEE Magnetics Society, IEEE CE Group, and other professional organizations. Tom was Chairman of the 2007 Santa Clara Valley IEEE Section and former Chairman of the Santa Clara Valley IEEE Consumer Electronics Society and the Magnetics Society. He is the founder and organizer of the Annual Storage Visions Conference, a partner to the annual Consumer Electronics Show as well as

the Creative Storage Conference. Coughlin Associates provides market and technology analysis as well as Data Storage Technical Consulting services. For more information go to [www.tomcoughlin.com](http://www.tomcoughlin.com)

## NEWSLETTER SUBSCRIPTIONS

The Digital Storage Technology Newsletter is a Quarterly Publication of Coughlin Associates. It is published quarterly. Subscriptions for 2008-2009 are \$199 and can be made using the form below. Subscription entitles subscriber to membership of Entertainment Storage Alliance, [www.entertainmentstorage.org](http://www.entertainmentstorage.org) and \$100 discount for 2009 Storage Visions Conference (call 408-871-8808).
